2nd International Androgen Receptor Symposium

26. - 27.04.2024

An event of the Department of Urology,
University Hospital Carl Gustav Carus
and Intercom GmbH

Prostate cancer is still the most common male tumour and its treatment is a major challenge, especially in advanced stages. Collaboration between international clinicians and scientists is critical in effectively improving patient care.

With the International Androgen Receptor Symposium, the Department of Urology Dresden offers a forum for exchanging scientific and clinical innovations.
